

PROFESSIONAL SUMMARY

Results-driven Software Engineer II with 3 years of experience building **high-performance backend and distributed systems** using **C++, Java, and Python** on **Linux**. Strong in **object-oriented design, concurrency, and low-latency system design**, with hands-on experience in **scalable backend services** and **RESTful APIs**. Familiar with core networking fundamentals (**HTTP, TCP/IP, TLS/SSL**). Proven ability to **improve system reliability, optimize performance**, and drive **CI/CD** and **DevOps practices** across **AWS, GCP, and Azure**.

SKILLS

• C++/C • Java • Python • Spring Boot • SQL • Git • Docker • Bash • Jenkins • HTML • CSS • JavaScript • XML
• Git • Cmake • Redis • MySQL • PostgreSQL • GraphQL • Azure • Kafka • GCP • Nginx • Aws • Linux • gRPC
• Powershell • Data Structure and Algorithm • Microservices • Design Patterns • Agile • Multithreading • CI/CD

WORK EXPERIENCE

Attentive Ai

📅 Jan 2026 – Apr 2026

Software Engineer

📍 Noida, India

- Resolved **API-DB inconsistencies** by fixing **soft-delete cascades** and enforcing **serializer validation** for UUID resources, improving data integrity.
- Standardized onboarding with **Docker-based setup, DB restore**, and **env configs**, significantly reducing developer ramp-up time.
- Reverse-engineered a large-scale **Django backend**, mapping **API→Service→DAL→DB** flow and async pipelines (**Celery, RabbitMQ**) in a distributed system.

Teradata

📅 Mar 2025 – Dec 2025

Software Engineer II

📍 Hyderabad, India

- Collaborated with **Dell engineering** to integrate **PPDM agent-based communication** into **C++ backend execution pipeline**, enabling secure job orchestration and interaction with **Data Domain storage** for **10TB+** enterprise backup workflows on Linux.
- Improved system **throughput and scalability by 30%** by optimizing **multi-threaded data pipelines**, tuning **network I/O and buffering**, and implementing **resilient retry mechanisms** in the job execution flow.
- Led **CI/CD and DevOps initiatives**, automating **build, deployment, and observability pipelines** using **Python and Bash**, improving release reliability and reducing operational effort by **30%**.
- Mentored **junior developers** on **API development**, improving team efficiency by **20%**.

Teradata

📅 Jul 2023 – Feb 2025

Software Engineer

📍 Hyderabad, India

- Designed and developed RESTful services and modular backend components**, contributing to system re-architecture and improving **scalability, maintainability, and performance**.
- Improved performance and reliability** of **S3-compatible object storage systems** (AWS, Dell EMC, IBM COS, MinIO) through **API-level optimizations and efficient data transfer**.
- Collaborated with **DevOps, SRE, QA, and platform teams** to operate and maintain **50TB+ distributed storage systems**, ensuring high **availability, reliability, and incident readiness**.

Teradata

📅 Jan 2023 – Jul 2023

DevOps Intern

📍 Hyderabad, India

- Built and automated **CI/CD pipelines** across **AWS, GCP, and Azure**, developing **Python and Bash automation** for deployments, **log processing, monitoring, and diagnostics**, and improving pipeline **throughput by 30%** through infrastructure optimization.

ACHIEVEMENTS

- Integrated the **MCP Server** with Teradata's enterprise platform to enable **distributed job orchestration and monitoring**, earning **Runner-Up recognition** and advancing to an **internal architecture review**.
- Solved over **600+ programming questions** on coding platforms, demonstrating dedication to improving programming skills.

PERSONAL PROJECTS

Network-Centric Real-Time Backend System

🐙 Github Link

- Built a real-time distributed backend system** using **C++, gRPC, WebSocket, and REST**, evolving from TCP-based networking to a production-style API gateway with streaming and performance benchmarking.

EDUCATION

Graphic Era Hill University

B.Tech in Computer Science and Engineering (CGPA: 8.64)

📅 August 2019 – July 2023
